800-000	Ø70 mm dial thermometer	4099745
800-001	Ø70 mm dial - box of 10	4099748

FoodSafe fridge thermometer

Most traditional temperature measuring devices in fridges only measure the air temperature. This is a major problem because cold air is heavier than warm air and therefore 'drops out of the fridge' the moment the door is opened.

The FoodSafe food simulant thermometer on the other hand is an encased thermometer that ensures it indicates temperature similar to that of the food stored in the fridge or chill cabinet. Ideal for commercial use, as it is reliable, robust and hygienic.

The unit indicates temperature over the range of -25 to 40 °C with an accuracy of ±1 °C over the range of -5 to 20 °C, 2 °C thereafter.

Each FoodSafe measures Ø25 x 150 mm and is supplied with a stainless steel hook for hanging in a fridge or cold cabinet.

Ø50 mm dial thermometer

This stainless steel, fridge/freezer thermometer has a Ø50 mm dial that indicates temperature over the range of -30 to 30 °C in 1 °C divisions.

The colour-coded area indicates when the thermometer is at the correct temperature for a fridge or freezer. The stainless steel housing measures 60 x 70 mm and can be free-standing or hung from a shelf.
