

SJE VERTICALMASTER® II AND SJE VERTICALMASTER® II PLUS PUMP FLOATS

Mechanically-activated, pump switches designed to operate in sump applications with limited space.

These mechanically-activated pump switches are designed to operate in non-potable water with limited space. They work well in small sump chambers and laundry trays, as well as in large tanks. These switches are not recommended for a sewage environment.

These switches not sensitive to turbulence.

Available for pump down applications only.
